

a second end extending into said second opening and sealably through
said second seal ring, whereby said flexible segment may bend between said openings
of the first and second members;

*Al
cont*

the second and third pneumatically seal rings being dynamic, and
an air passage connecting the area between the second and third seal
rings to the outside atmosphere.

~~32.~~ As in claim ~~31~~, wherein

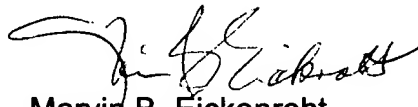

said second and third seal rings are elastomer seals.

Remarks

Attached hereto is a "Terminal Disclaimer" from the owner of this application and
prior Patent No. 4,244,316 which obviates the Examiner's double patenting rejection
of claims 1 to 22 (assumed to be 9 to 30) identified in applicant's amendment.

The Examiner is respectfully requested to favorably consider the foregoing new
claims 31 and 32. Obviously, the Disclaimer would apply to any rejection of these
claims based on double patenting.

Respectfully submitted,

Marvin B. Eickenroht
Reg. No. 17,279
